A review of the list of certified energy managers has shown that there is a relatively small number of experts who are actively engaged as consultants on the market. Most certified individuals are employed by companies and institutions that are legally obliged to implement energy management regulations.

Taking the above into account, a decision was made to invite three economic operators identified through a review of the data available in the Serbian Business Registers Agency (SBRA). In order to ensure the transparency of the procedure and enable the participation of all interested parties, information on the procurement procedure will also be published on the company's website.
